

Manlift Ticket London

Manlift Ticket London - The Elevated Platforms and Manlifts Certification program helps to provide the required training on the safe operating procedures, work practice, rules and regulations regarding the everyday activities for the operators of this machine. The course has been designed for individuals who are actively involved in these activities or individuals who have a basic knowledge of this machinery.

In the past couple of decades, aerial platforms and manlifts have become a common sight in industrial maintenance applications and on construction job sites. These equipment provide an easy way to lift staff near what must be done on a stable platform apparatus, enabling workers to perform tasks with greater safety and comfort rather than being perched on top of ladders or scaffoldings.

The manlift is like other industrial devices in that they are safe if used properly. Because they lift staff above ground level or floor, accidents could easily happen and this could result in serious fatalities or injuries for both the operators of the manlift and any passerby who might not be lucky enough to be standing below.

There are different types of manlifts. Nearly all fall into 1 of 2 categories: the articulating boom lift, which has the capability of both vertical and horizontal movement and the scissors lift, that is capable of moving up and down.
